In chrzaszcz you are walking through a maze. The whole maze is divided into chambers. In order to go to a different chamber you must open a door. In order to open a door you must have a key.

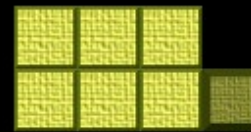

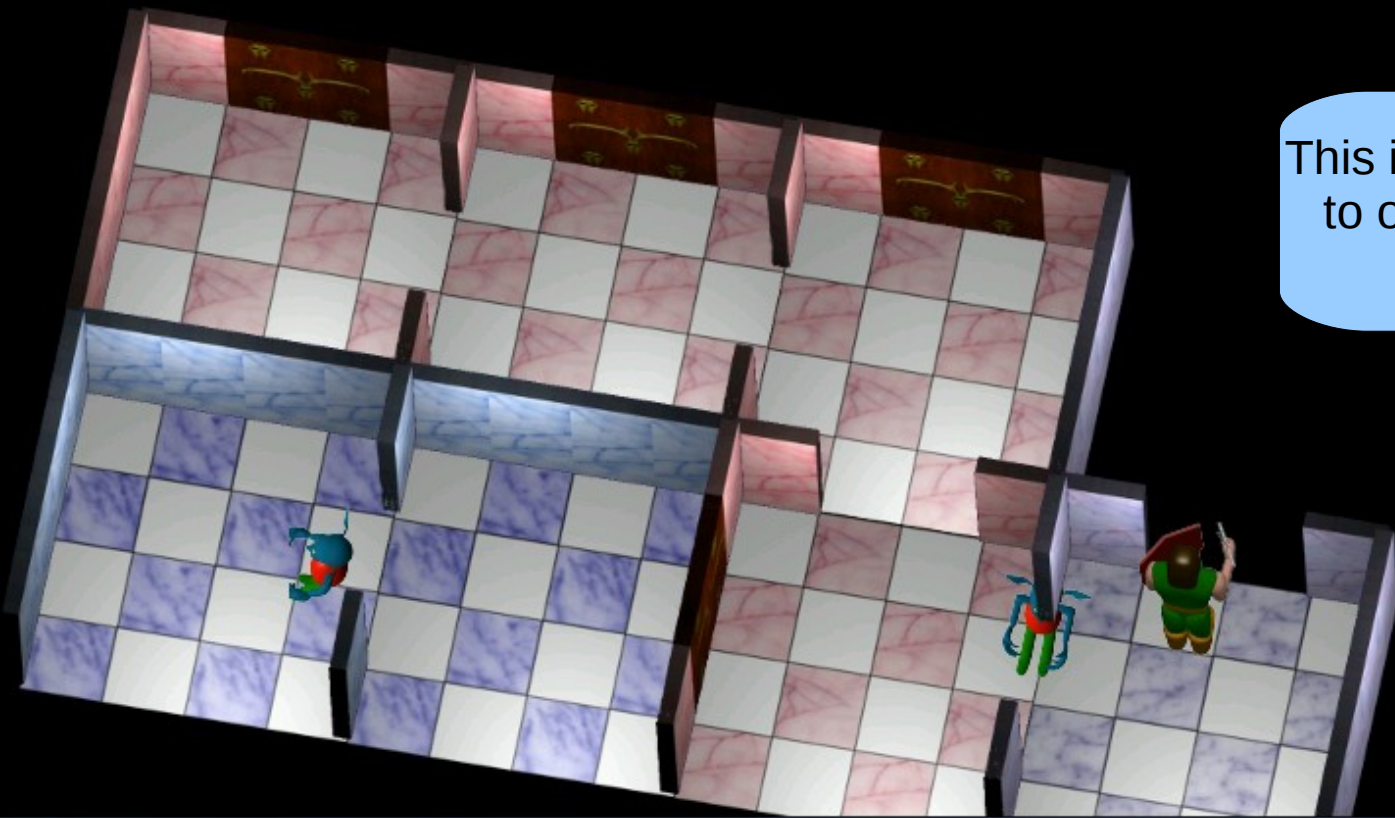

Here are the keys that you currently have.

This is a minimap showing you the chamber you are currently in.

This is the key you need to open the door you recently hit.

Press **ENTER** to change the keys

To open the door you sometimes need to exchange the keys with the orcs living here. Do not be afraid, the orcs are friendly and they always allow you to reverse the transaction. But sometimes they will not give you anything.
